## Problem with login link. Please help ASAP

Posted by shnaqvi - 2008/05/08 23:59

---

I have just installed fireboard on my site and everything seems to be working fine except for one thing. When I click on login link, it takes me to the joomla login page. I am CBlogin for users to login. I want to be able to use the same login for firboard as well.

One observation that if I click on register and lost password, it taked me to the right pages so it's only the login link.

If it's not fixable, can I just take the whole login box out and use my login box that I use on my website.

Please help ASAP.  
Thanks in advance.

I have the same problem, the "login" link just goes to the main page. No idea how to fix it, but hope that someone tells us.
