## database problem that goes away on reload

Posted by damo - 2008/05/09 11:45

---

Serious db problem: You have an error in your SQL syntax; check the manual that corresponds to your MySQL server version for the right syntax to use near `'where userid=0'` at line 1 SQL=UPDATE mos\_fb\_sessions SET allowed='\na', readtopics='\', lasttime= where userid=0

basically, this is what users get for the first time they click into the forum. if they hit refresh it goes away

can anyone tell me how to get rid of this?

thanks
