
Change topic icons to Text?

Posted by Rapunzl - 2008/05/09 16:34

I would like to change the topic icons to text and use them as filters like this:

http://www.bestofjoomla.com/images/fbfiles/images/content_filters.jpg

I guess this is a two-parter:

1. How do I change the icons to text?
2. Is it possible to allow these to filter content?

Any ideas would be greatly appreciated.
