
Fireboard 1.0.4 - Fullpatch Packages- New features

Posted by viet4777 - 2008/05/09 14:46

Info (latest update) and download link:

http://luyenkim.net/home9/component/option,com_fireboard/Itemid,88889169/func,view/catid,5/id,2021/lang,en/#2021

Tested on Joomla 1.0.13 and 1.0.15.

Demo:

1. http://luyenkim.net/home9/component/option,com_fireboard/Itemid,88889169/lang,en/

2. http://xahoihoctap.net/component/option,com_fireboard/Itemid,26/lang,en/

Fixed problems and additional features: Signature with ' and " Closed topic Fixed Itemid, redirect pages, statistics, member list viewed by logged in, utf-8 char with topic preview Added: mp3, right, left, center, justify, hide and hideurl buttons included vietnamese language Using with plugin_jw_allvideos.zip: addition clip.vn, youtube, google videos, and imeem single song and album. better link parsed and determined. New reduced link feature is set. Auto resized for big dimension Image by CSS (tested with IE 6 and FF). Included Dorona Brown 1.0.1 and Default_ex templates. Installation guidance: Just upload com_fireboard.zip onto joomla installation folder. Then unzip it, all files will be override on original fireboard folders. Install bot_rss.zip and published it. Install plugin_jw_allvideos.zip and published it.

Using some features: Hide tag 1. Text - only logged user can view the Text text inside Hide TAG.

2. Text- only logged user with X post(s) can view the Text text inside Hide TAG. HideURL: 1. your link

2. Text display Demo:

1: http://xahoihoctap.net/component/option,com_fireboard/Itemid,26/func,view/id,419/catid,33/lang,en/

2: 70 n m tinh ca Vi Ct Nam - Vllmp3 - only for mp3 link

1: link

link

2. link, title will be display if mp3 file tag is set.

3. {_wmaremote}link{/wmaremote} for mp3 playing with windows media player.

Remove _ for your application when using wmaremote TAG. Demo:

http://xahoihoctap.net/component/option,com_fireboard/Itemid,26/func,view/id,135/catid,33/lang,en/#135Video:1.

{_youtube}id{/youtube}

2. {_google}id{/google}

3. {_clip.vn}id{/clip.vn}

4. Other, see details in plugin_jw_allvideos setting. Demo:

http://luyenkim.net/home9/component/option,com_fireboard/Itemid,88889169/func,view/id,150/catid,4/lang,en/#150IMEE

M music and album music: 1. {_imeem}xGrc7jzNO6{/imeem} for single music

2. {_imeem_album}GrToruk5eH{/imeem_album} for music album Demo:

http://xahoihoctap.net/component/option,com_fireboard/Itemid,26/func,view/id,351/catid,33/lang,en/ then select music

album tab. Auto sized image display:

<http://www.10thussar.co.uk/as.jpg>

Real image: <http://www.10thussar.co.uk/as.jpg>

Info and download link:

http://luyenkim.net/home9/component/option,com_fireboard/Itemid,88889169/func,view/catid,5/id,2021/lang,en/#2021

Re:Fireboard 1.0.4 - Fullpatch Packages- New featu

Posted by mcrollo - 2008/05/10 23:18

Hi,

I have downloaded this package twice, there is no "default ex" template inside. Only the standard default templates, numinu (and in there the complete numinu template folder again) and dorona brown (maybe in there the dorona again).

Greets
Mc :)

Re:Fireboard 1.0.4 - Fullpatch Packages- New featu

Posted by viet4777 - 2008/05/11 00:14

Arcanjo:Hi!

viet4777 great!!! but can you addon the private forum hack that is in the contribution forum?...please??

Arcanjo
Yes, I would like to add it also. I hope it will be added soon.

@mcrollo: thank you very much, I just updated it and put bot_slideshare on with them.

This code is running well on my application, and maybe It runs a little diffident on your website.

My website: Joomla 1.0.15, PHP 5.2.5 hosted by 1and1

What would you means?

Re:Fireboard 1.0.4 - Fullpatch Packages- New featu

Posted by rinuccio - 2008/05/11 16:06

Excuse me, use "google translate".

I have read that this "patch" corrects the problem in the discussions blocked.

On my forum, when block a debate, everyone can respond.

Dall'archivio you refer, I wanted to extract and just overwrite the files that correct this problem.

What are these files? thanks :-)

Re:Fireboard 1.0.4 - Fullpatch Packages- New featu

Posted by Arcanjo - 2008/05/14 06:11

Hi!

Sorry being such a pain... can you add Polls System in your Moded Fireboard? Is a contribution that only is working in default template...but it could be great if it works with the default Ex template...can you do it?? (sure you can ;)

Now...for me to make this complete it only needs a new search engine like there is in SMF or phpBB but I think that is asking to much!

Thanks for you great work!!!

Arcanjo

Re:Fireboard 1.0.4 - Fullpatch Packages- New featu

Posted by viet4777 - 2008/05/14 08:04

I can do if you attach their files for me. I do not want to reg at his website.

I am rewriting some TAG without mambot, so we can run with Joomla 1.5.x.

Thanks.

clanspot wrote:

Which File Set is the latest release of this?

Just the released FB 1.0.4 at

http://www.bestofjoomla.com/component/option,com_extensions/page,show_extension/adid,1/catid,3/Itemid,67/

And I modify it for my forum running with mambot and fixed some errors.

http://luyenkim.net/home9/component/option,com_fireboard/Itemid,88889169/lang,en/

http://xahoihoctap.net/component/option,com_fireboard/Itemid,26/

Almost modifies (closed topic, private/restrict forums,...) are taken from this forum.

Some new features I added: reduced links, new bottons,... Some are ok but some need more test.

Now I rewrite some TAG without mambot (only rss feed I can not do), and now It can run with Joomla 1.5.3:

<http://xahoihoctap.net/webs/j15x/index.php>

you can test with: (UN : PWD) are (demo:demo), (demo2:demo2).

Thank you!

P/s: I do finish this modification until this weekend. Hope this will help for you!

I got the file.

But this modify also change core Joomla file in administrator/component/com_poll/admin_poll.php.

One more question, I see Polldaddy looks nice and easy integrate. We can use Polldaddy instead of Joomla poll. What's the different?

Thanks.
Viet

Re:Fireboard 1.0.4 - Fullpatch Packages- New featu

Posted by viet4777 - 2008/05/17 23:45

This topic is very strange. It 's not shown in Recent topics as before!?

Anyway, thank all for this topic.

I just finised modify for Fireboard 1.0.4 with Joomla 1.5.3 and J 1.0.15.

The download will be available soon.

Best regards!

Viet.

P/S: J 1.5.3 with FB 1.0.4 - <http://xahoihoctap.net/webs/j15x/testing-forum/18-about-fireboard-on-this-website.html>
J 1.0.15 with FB 1.0.4 - http://xahoihoctap.net/component/option,com_fireboard/Itemid,26/func,view/id,497/catid,9/lang,vi/

With so many new features. I hope the FB 2.0 will with MVC model for native J 1.5.x will make it more reliable and easy development.

Thank FB teams!

viet4777 what was you conclusion? polldaddy? (they almost do the same)..

Arcanjo

It's better to have many poll systems (poll daddy, joomla poll,...) for Fireboard.
http://xahoihoctap.net/webs/j15x/testing-forum/ - no plugins needed! I rewrite it in interpreter.fireboard.inc.php . Test with account (username+password) like (demo+demo) or (demo2+demo2).

I read all posts here
http://www.bestofjoomla.com/component/option,com_fireboard/Itemid,38/func,view/id,35552/catid,68/limit,10/limitstart,0/
and cannot see any demo.

Re:Fireboard 1.0.4 - Fullpatch Packages- New featu

You can upload this file onto the root of Joomla folder. If you are using SEF, it maybe does not work.

Re:Fireboard 1.0.4 - Fullpatch Packages- New featu

Posted by tevez - 2008/08/18 13:25

topic lock not working... im using numinu nvac... please help me...

Re:Fireboard 1.0.4 - Fullpatch Packages- New features

Posted by grinchy - 2008/08/18 17:01

That template is a Joomla Me modified version of BoJs original Numinu template. It is no longer supported by either.

Re:Fireboard 1.0.4 - Fullpatch Packages- New features

Posted by tevez - 2008/08/18 22:24

but i think the problem is in view.php

maybe somebody can give what is the code that was changed or replace in view.php when the lock issues is fixed...

Re:Fireboard 1.0.4 - Fullpatch Packages- New featu

Posted by cipher - 2008/08/19 15:35

Hi There,

This sounds like just what I am looking for.
One question, do we download the version from your original post?

The private form option is very important to me and so I am looking for your updated version.

Cheers

I would strongly recommend you to use latest nightly build instead of this. There have been more than 350 bugs fixed since 1.0.4

=====
Re:Fireboard 1.0.4 - Fullpatch Packages- New featu

Posted by cipher - 2008/08/19 17:32

Thanks for the recommendation, but last night I was told that the SVN version was currently unavailable.

I really want to be able to use private forums on my site for private urbanisations (housing estates), organisations, clubs & associations. But Fireboard currently doesn't support this. I don't really want to use a hack as this causes problems later, especially when trying to tie it all in with Joomla, Community Builder and much more.

But if this sort of functionality has yet to be implemented in Fireboard I have 2 choices.

- 1 - Change forum software (I don't want to do this as I like Fireboard)
- 2 - Use the hack

If the SVN is now available and the 1.0.5 is still a long way off I will use it, provided it either will work with the hack or has it built in.

Alternatively if 1.0.5 is coming out shortly I prefer to wait, however once again only if it will work with the hack, or has it built in now.

Cheers,

Chris Petti

Latest nightly builds are already snapshots of working SVN version. FB 1.0.5 is near RC1, so pretty stable already.

Yes but does either have the private forum hack built in or will it work with the hack?

I would assume not, as Private forum is a hacked 1.0.4 feature.

=====

Re:Fireboard 1.0.4 - Fullpatch Packages- New featu

Posted by cipher - 2008/08/26 18:07

So what do you suggest...

Hack 1.04 and wait until Fireboard implements private (groups) forums.
Or forget Fireboard and change to something else?

I don't want to do the second option but at this moment functionality is much more important to my website. :unsure:

If I had more of an idea when or if Fireboard were going implement this feature it would help myself and many others

Re:Fireboard 1.0.4 - Fullpatch Packages- New featu

Posted by Usama - 2008/09/03 08:49

Can anyone please tell me how to add this feature separately

Added: mp3, right, left, center, justify, hide and hideurl buttons

Thanks much in advance ;)

All the hack are based on the guidances in the Forum. You should have a look on the code in fireboard.interpreter.inc.php. So, you easily find through Search function.

anybody can help me about topic lock? I have a problem with that... :(

Old locked topics before the hack should be unlocked and locked again.

Thanks viet for your reply. :)

Can you please tell me the specific files which these tags depends on?

I mean, are there any edits should have been made to files other than fireboard.interpreter.inc.php ?

Thanks again.

This is the guide in Vietnamese:

http://luyenkim.net/home9/component?option,com_fireboard/Itemid,88889169/func,view/id,665/catid,5/lang,vi/

You should change these files:

administrator/components/com_fireboard/language/vietnamese.php ho-c english.php

components/com_fireboard/template/default/smile.class.php

components/com_fireboard/sources/fb_bb.js.php

Guide in English:

http://www.bestofjoomla.com/component/option,com_fireboard/Itemid,38/func,view/id,21343/catid,75/#21343

Thank so much viet, your help is really appreciated.

I followed the guide perfectly and it works great, thanks much.
