
Not getting email notifications

Posted by robgratt - 2008/05/13 06:01

Hi,

Searched the board for an answer but couldn't find a solution that worked.

Have just installed FB and all went smoothly.

However, subscribers aren't sent email notifications when a thread is updated.

Tried sending a Mass Mail and that worked great so I assume my SMTP setup is working...

Anyone any suggestions?

TIA,

Rob
