
Posts at the bottom of content pages, like IMDb?

Posted by zooboo - 2008/05/14 00:58

Does anyone know of a FB extension -- or any other way -- to have a forum on each page like IMDb or Amazon.com (both have 5 or so posts feeding into discussion boards at the bottom)?

If possible, I'd like for the posts on these pages to feed into a forum category that the page is a part of.

Thank you for any help you can provide!!!

I always hate it when people ask "any one," a day after they create the thread, but I'm in need of some help.

Anyone? ;)
