
Cant find the User interface for FB on Joomla 1.0

Posted by jimbo - 2008/05/16 09:34

I downloaded and installed the FB as a component in Joomla 1.0. Im running it in localhost mode. it seems that the component installed properly as I can see the admin side of it and it is showing up as a compnent. My question is, how do i get to the front end so i can actually see the board?? simply cant find it...
