## The black buttons problem

Posted by BigMal - 2008/05/19 15:02

---

Hi,

I'm suffering a relatively common problem where the "Submit", "Preview" and "Cancel" buttons have black text on a black background.

I have read other threads about how to fix the problem:

1. editing "input" in the file template\_css.css to change buttons for the whole site (I don't want to do this)
2. editing table#fb\_postmessage.button in template/default/forum.css (this didn't work)

If someone could provide any advice it would be much appreciated.

site: www.mypt.co.nz

uid: test

pwd: test

Thanks in advance.

How did you fix the issue with the black button?

How did you fix it? I'm struggling with the same black button issue.

EDIT TO ADD: RESOLVED

---

In default\_ex\_rejuvenated template, find forum.css.

Open in plan test editor, and on line 780, find this code:

```
table#fb_postmessage .button {  
border: 1px solid #999;  
color: #333;  
font-weight: bold;  
padding: 3px 10px;  
margin: 3px;
```

Change the color from 333 to FFF, so the code looks like this:

```
table#fb_postmessage .button {  
border: 1px solid #999;  
color: #FFF;  
font-weight: bold;  
padding: 3px 10px;  
margin: 3px;
```

Now the block is black with white text.

A guide to three character colors can be found here:
