
Community Builder, Fireboard plugin Profile Tab

Posted by jeeep - 2008/06/17 05:55

I'm using Joomla 1.5, CB 1.1 and Fireboard 1.0.4 . I am experiencing a layout problem when the user log's in and views their profile then clicks on the "forum" tab. If the user is logged out and views their profile or anyone elses the layout is fine. Does any one know how to reslove this? Thanks!
