

## [solved] DB function failed with error number 1054

Posted by carsten888 - 2008/06/24 18:16

DB function failed with error number 1054

```
Unknown column 'g.id' in 'on clause' SQL=SELECT a.*, a.name AS category, u.name AS editor, g.name AS groupname,
h.name AS admingroup FROM jos_fb_categories AS a LEFT JOIN jos_users AS u ON u.id = a.checked_out LEFT JOIN
jos_core_acl_aro_groups AS g ON g.id = a.pub_access LEFT JOIN jos_core_acl_aro_groups AS h ON h.id =
a.admin_access GROUP BY a.id ORDER BY a.ordering, a.name
```

when trying to edit categories. All works fine on localhost, but online I get this error.

Joomla 1.0.15  
FireBoard 1.0.4

solved!:laugh:

version:  
fireboard 1.0.4

file:  
administrator/components/com\_fireboard/admin.fireboard.php

line:  
382

```
$database->setQuery("SELECT a.*, a.name AS category, u.name AS editor, g.name AS groupname, h.name AS
admingroup"
. "\nFROM #__fb_categories AS a"
. "\nLEFT JOIN #__users AS u ON u.id = a.checked_out"
. "\nLEFT JOIN #__core_acl_aro_groups AS g ON g." . ((FBTools::isJoomla15()))?'"':"group_")."id = a.pub_access"
. "\nLEFT JOIN #__core_acl_aro_groups AS h ON h." . ((FBTools::isJoomla15()))?'"':"group_")."id = a.admin_access"
. "\n GROUP BY a.id"
. "\n ORDER BY a.ordering, a.name");
```

change to

```
if( defined('_JEXEC') ){
//joomla 1.5
$group_id_col_name = 'id';
}else{
//joomla 1.0.x
$group_id_col_name = 'group_id';
}
```

```
$database->setQuery("SELECT a.*, a.name AS category, u.name AS editor, g.name AS groupname, h.name AS
admingroup"
. "\nFROM #__fb_categories AS a"
. "\nLEFT JOIN #__users AS u ON u.id = a.checked_out"
. "\nLEFT JOIN #__core_acl_aro_groups AS g ON g.$group_id_col_name = a.pub_access"
. "\nLEFT JOIN #__core_acl_aro_groups AS h ON h.$group_id_col_name = a.admin_access"
. "\n GROUP BY a.id"
. "\n ORDER BY a.ordering, a.name");
```

works on both joomla 1.0.15 and 1.5 !

problem is in this code:

```
((FBTools::isJoomla15()))?": "group_"
```

which is suppose to return " for joomla 1.5.x and 'group\_' for joomla 1.0.x (because they reamed that column), but somehow does not. the above code does the same, but works.:

open source rulez!

@fireboard team:  
please include this code in your next release.
