
siteground-j15-14 trouble

Posted by stefanpn - 2008/07/14 20:45

Hi,

I have big trouble with siteground-j15-14 :(

I modified this template to suit my needs but trouble is that text in article can not be aligned to center or right it can only be left. I know that I should change somewhere in template.css to not be text-align: justify, but i have no idea where...

Any help would be appreciated.

I solved the problem by myself.

For everyone who had the same problem here is the solution:

siteground-j15-14 have error in template.css file, instead of:

```
p {  
  margin-top: 0px;  
  margin-bottom: 5px;  
  text-align: justify;  
}
```

you should put this:

```
p {  
  margin-top: 0px;  
  margin-bottom: 5px;  
}
```

Also you should change TinyMCE editor with something compatible with XHTML 1.0, like JoomlaFCK or something...

Have a nice day!
