## Default EX problem with links

Posted by Baze - 2008/04/30 12:32

---

I have noticed strange thing on Default EX on my site, on the recent discussions tab, if i click on page number, e.g. topic has 5 pages, and if i click on "5" (or any other page number) the forum redirects me to the categories view instead to the topic.

anyone else has this problem??

Hi,

this topic was discussed in this forum weeks earlier:

modify flat.php ...

in line 276 and line 303

replace \$catid with \$leaf->catid

Greetings

Mc

Thanks a million ;)

works like a charm..
