
Conv from J\board - Warning message, no posts.

Posted by sbeaver - 2007/05/09 19:24

Installed FireBoard today and hit the convert button. All my forums, sections and posts popped right up.

Unfortunately, when I click on a post to view it, I see this message:

```
Warning: Invalid argument supplied for foreach() in  
/var/www/html/Bucker/components/com_fireboard/template/default/view.php on line 636
```

and:

```
Warning: Invalid argument supplied for foreach() in  
/var/www/html/Bucker/components/com_fireboard/template/default/view.php on line 1896
```

The forum post does not appear.

The forum can be viewed at:

http://www.bucker.info/index.php?option=com_fireboard&Itemid=61&func=view&id=29&catid=11

Thanks for your help. - I can't wait to see this work!

Steve

Steve,

Try downloading the file in this post as it has fixed this for most people.

http://www.bestofjoomla.com/index.php?option=com_fireboard&Itemid=38&func=view&id=2218&catid=2#2519

That fixed it. - Thank you. I can't believe how much nice this forum system is. Everything I could hope for.

Thanks again for your help.

Steve
