
Forum Upsidedown?????

Posted by MoveTwice - 2007/04/28 05:21

I just converted from joomlaboard, but insted of showing the first post on top when I view a thread the first post is on bottom???? Any way to fix?

Try going to your forum profile (either via FB or in CB if it's integrated) and selecting Oldest Post First instead of Newest Post First.

turned out to be a problem with my servers php.ini file.

max_input_time = 60

so when people typed/edited for longer than a few minutes it would drop their connection. OOPS! haha thanks anyway.
