
Problem with the promotional movie

Posted by Willin - 2007/05/27 06:13

Hi team...

Today I was searching in bestofjoomla and try to watch the promotional movie, really great in both views, little windows (could be ajax?) and full screen, but when I press close, in IE 7.0 give it a error message and the complement didn't close.

Don't know if is a problem of my browser or the movie, anyway... maybe a look to the movie just to confirm, right?

Great site and to me, the best component for joomla. FireBoard Rocks!

:laugh:

Regards from Iquique, Chile.

I tried with IE 7 and it worked. No errors.
