Released Fireboard RE ver. 1.6.

Over 100 code fixes.

Main features:

- * full support multi-announces,
 - * announces now support html tags,
 - * announces now support visual editors,
 - * user groups with group picture & color,
 - * russian search procedure bug fixed now,
 - * ban-system: full ban and read-only mode,
 - * pop-up notify users about ban or read-only mode,
 - * configurable pop-up messages,
 - * allow guests download attachments - on/off (if "OFF" - guests can see files, but cant DL),
 - * display posts edit info & editing reason (like this forum... :))
 - * double-load pages bug fixed,
 - * "mark all forums read" bug fixed,
 - * russian simbols in user signature bug fixed,
 - * admin User management bug fixed,
 - * russian filenames in attach bug fixed.
- and more...

Full russian localised front-end & back-end.
