
Snitz forum Migration

Posted by alebog - 2007/05/29 20:31

I have a snitz forum and I'd like to migrate to fireboard. Is there a way to convert the mdb snitz database into the fireboard one?

Not sure. If you could get it converted to SMF, you should be able to convert to FB when the official SMF>FB converter is released.

Yep, just checked, there is a Official Snitz to SMF converter available from the SMF site.
<http://www.simplerachines.org/download/?converters>

Then you can wait for the official SMF to FB converter with the rest of us :)
Good luck!
