
Video embedding!!

Posted by paperboy - 2007/04/18 15:04

love the work you guys are doing!
video is a massive component of the internet this days,
people tent to leave links on forums to their youtube,google, ect, page, this causes your users to leave your site. so being
able to let users enbed the video on the forum will be a major plus,
can wait for stable release and jb migration plan.
thanks.
J.

Re:Video enbeding!!

Posted by FidelGonzales - 2007/04/18 22:50

I agree. Great work thus far. Easy video embedding is essential and not widely offered with other forums on the net. This
would make the site forums using this component take off, since off-site links to view video would not be necessary, and
it would all be viewed through the forum.

Re:Video enbeding!!

Posted by paperboy - 2007/04/19 00:14

or aleast to work with Allvideos plugin.

Re:Video enbeding!!

Posted by fuqaha122 - 2007/04/19 08:37

i think a better solution is an option to enable Mambots inside FireBoard.

=)

Re:Video enbeding!!

This would be the killer! Would love to see this!

Greetings

Re:Video enbeding!!

Posted by Maria - 2007/04/19 10:41

Mambot idea is good stuff :D noted down

Re:Video enbeding!!

Posted by paperboy - 2007/04/19 14:25

you Rock Maria!:laugh:
any sense of stable release time?

Re:Video enbeding!!

Posted by Maria - 2007/04/19 14:38

any sense of stable release time?

Well, considering this is the 2nd day of release, give us a little bit of time to make it stable. We are daily basis working on it.

Cheers

Re:Video enbeding!!

Posted by fuqaha122 - 2007/04/19 19:35

yeah, sure. thanks!

FireBoard is growing rapidly!

=)

Sorry i can't help i only have a live site and my forum is cooking, i'll play with this one in the mean time,
J.

Re:Video enbeding!!

Posted by kuato - 2007/04/20 13:16

To add youtube video in joomlaboard i edit the smile.class.php file and put this

//video

```
$sb_message_txt = preg_replace("/^(.*?)\Vsi", "", $sb_message_txt);
```

It works with joomlaboard, i dont know if this works with Fireboard too.

Re:Video enbeding!!

Posted by paperboy - 2007/04/20 14:52

sounds good, will the users need to put the embed code the url or the video id only before highlighting and hiting this new feature?

thanks

J.

Re:Video enbeding!!

Posted by ahchv - 2007/04/20 21:54

Hey guys,

Is this option available anywhere else? Still trying to figure out how to allow embedded youtube videos on my site

thanks!

Re:Video enbeding!!

Posted by kuato - 2007/04/20 22:26

The code that i use in Joomlaboard works great, the users just need to ad a tag like 4h34ju34j
I dont know how to implement it on Fireboard.

Re:Video enbeding!!

Posted by ahchv - 2007/04/20 22:34

Do you know how to activate HTML tags by any chance? That would solve the problem too...

Re:Video enbeding!!

Posted by PGLion - 2007/04/20 23:42

Would be great if the video could be added trough a BBcode-button or a pull-downlist with all video providers listed. So you don't have to type the tags.

Re:Video enbeding!!

Posted by florut - 2007/04/21 00:45

Well while waiting for a release including mambot support you can just modify the "view.php" file founded in /components/com_fireboard/template/ :

First find this at the beginning of the file :

```
defined('_VALID_MOS') or die('Direct Access to this location is not allowed.');
```

```
global $acl;
```

```
and paste right after that :
```

```
//  
class t{ var $text = ""; } // Déclarer une classe avec une variable "text"  
//
```

Then find :

```
$msg_text =str_replace("_CRLF_", "\n", stripslashes($fb_message_txt));
```

and paste right after :

```
//  
/* Activer les bots de contenu sur le message */  
global $_MAMBOTS; // variables globale des Mambots  
$row = new t(); // Nouvelle instance de cette classe t  
$row->text = $fb_message_txt; // définir la propriété text de cet objet (corp du msg)  
$_MAMBOTS->loadBotGroup( 'content' ); // charger les bots de contenu  
$params =& new mosParameters( " " ); // pas de paramètre  
$results = $_MAMBOTS->trigger( 'onPrepareContent', array( &$row, &$params, 0 ), true ); // execute l'action des bots  
$msg_text = $row->text; // remplace le corp du msg par le resultat des bots  
/*Fin de l'activation des bots de contenu sur le message */  
//
```

I just adapted this method from a one for JB submitted here. Some feedback already here.

PLEASE LET ME KNOW :

- If this works (for testers)
- If there is no security problems (for developers)

Thanks in advance.

Re:Video enbeding!!

Posted by Kingspawn - 2007/04/21 06:46

on the uploads tab!!!!!!

Specify here which file types are allowed for upload. Use comma separated lowercase lists without spaces.

Example: zip,txt,exe,htm,html B)

Re:Video enbeding!!

Posted by kuato - 2007/04/21 08:26

Wow , nice one flurut!.

Re:Video enbeding!!

Posted by Maria - 2007/04/21 09:20

Well done!

Re:Video enbeding!!

Maria wrote:

Mambot idea is good stuff :D noted down

See that post, we already had it enabled in Joomlaboard, will be easy to port to Fireboard. Nice and clean, I think.

(Credit for the code does not go to me, though.)

Re:Video enbeding!!

Posted by florut - 2007/04/21 10:57

Hm. It's exactly (for each word) the same method.
To enable it for FB, i simply changed \$sb_message_txt for \$fb_message_txt.

No need to be a coder to adapt good work as JB/FB !!

Thanks so much to the whole team united now !

Re:Video enbeding!!

Posted by danialt - 2007/04/21 11:40

Yup, we are thinking of embedding mambots as native for JB, with our own calls, like beforePost, signatureSave,... so you can have a total control on the content generated and saved.

I'm at the moment planing how to do it

Re:Video enbeding!!

Posted by kuato - 2007/04/21 14:27

The next release of Fireboard will be awesome, i hope you guys can implement the mambot idea, i dont like the harcoded things hahaha.

Re:Video enbeding!!

Oh, you already posted the method here, sorry, for replicating it - I did not read further than page 1 of this thread before replying.

Thanks again for that mambot code florut, both for Joomlaboard and Fireboard! It really enhanced the board at my page!

Re:Video enbeding!!

Posted by grumblemarc - 2007/04/28 00:07

I guess it all depends on what template you're using. In the newer templates there is no view.php in any folder. Actually there are a LOT of files "missing" from the newer templates (how do they work without those files ?).

Not that it matters. I tried modifying the default template's view.php with no results after following the all the above posts to the letter. I think I'll wait until the next release. If I wanted to hack files I'd be using PHPBB. I prefer Fireboard.

Re:Video enbeding!!

Posted by c0caine - 2007/04/30 16:22

I decided to add video support to my fireboard by adding some code (as mentioned earlier) to the smile.class.php

find this line

```
// italic
```

```
$fb_message_txt = preg_replace("/(\)(.??)(\)/si", "\\2", $fb_message_txt);
```

and add the following code

```
//youtube
```

```
$fb_message_txt = preg_replace("/^(.??)\vsi", "", $fb_message_txt);
```

```
// Myvideo
```

```
$fb_message_txt = preg_replace("/^(.??)\vsi", "", $fb_message_txt);
```

```
// Google Video
```

```
$fb_message_txt = preg_replace("/^(.??)\vsi", "", $fb_message_txt);
```

```
// Clipfish
```

```
$fb_message_txt = preg_replace("/^(.??)\vsi", "", $fb_message_txt);
```

Use:

Video-ID

Video-ID

Video-ID

Video-ID

That is how I have seen other boards implement embeded video and that's how I am going to do it as well for the time being. Thanks for sharing the code.

I'll still ad my vote for Mambot/Plugin support in Fireboard though. That would still be good core functionality, but I would like to see it restricted to user classes (moderators, admins).

=====

Re:Video enbeding!!

Posted by eli - 2007/05/01 04:19

It works, as long as there aren't any weird spaces. When I copied the code, for some reason, the lines broke several times, resulting in raw code being displayed on the forum. Going through and bringing lines together fixed it though.

Re:Video enbeding!!

Posted by Goanna - 2007/05/02 05:25

I have now implemented both hacks mentioned in this thread. The mambot/plugin hack works fine. I dont know if I will use it on a live site due to security issues, but if it could be locked down so only admins can use that function then it would be great.

As for the BBcode, it seems to work but the video never loads. The outline for the player shows up but that's it. Anyone else having that problem?

EDIT: The code didnt work because of the line breaks as someone else mentioned. I didnt even notice them because I had word wrap turned on in my editor, lol.

Wow, you guys are brilliant, and awesome! Nice work, this is great.

It didn't work for me either though, but I found the issue, I just had to learn how to code in "joomla speak". Your embed code is a bit complicated. I think it needs to look like this:

```
//youtube  
$fb_message_txt = preg_replace("/^(.*?)\s/i", "", $fb_message_txt);
```

This works great for me. This is how you implement:

You don't actually put in a URL, you just put in the "ID". So if you're looking at the URL:

<http://youtube.com/watch?v=rHo7BHo3CJQ>

You would just embed the ID part, which is "rHo7BHo3CJQ"

Like this:

rHo7BHo3CJQ

BTW... how hard would it be to make this a button when you post a topic?

Re:Video enbeding!!

Posted by florut - 2007/05/02 19:51

Here we are already :

You can download the pack of hacks that i included in a template package at this address :
http://www.aide-joomla.fr/component/option,com_docman/task,cat_view/gid,106/

Please post any issue in this forum.

=====

HACKS INCLUDED

=====

- Mambots loaded in messages and announcement plugin (to include media in forum message for example)
- PMS systems Missus and Jim support included
- announcement plugin enabled and hacked to display up to 3 announcements at a time, WITH HTML SUPPORT
- "online" and "offline" logo enabled
- some bugs fixes as SEF compatibility and others.
- little tricks to add one by one as FB Fullscreen, RSS Feed, Overlib tip, Date (please read each readme.txt in each subfolder of the "astuces-tricks" folder)

=====

Re:Video enbeding!!

Posted by florut - 2007/05/03 19:14

For those who found painful to install the hacks, i will develop now a full installation package including the hacks. You still will have to register to download it here :

http://www.aide-joomla.fr/component/option,com_docman/task,cat_view/Itemid,./gid,106/orderby,dmdatecounter/ascdesc,DESC/

Re:Video enbeding!!

Posted by tedmiller - 2007/05/06 20:22

I had some problems with c0cain's code and I edited the only youtube part and it is working alright with ie and firefox

```
//youtube
```

```
$fb_message_txt = preg_replace("/^(.*?)\s/i", "", $fb_message_txt);
```

=====

Re:Video enbeding!!

Posted by c0caine - 2007/05/07 10:06

The code works fine but just as mentioned above if line breaks appear after copying into your editor, be sure to remove them or the code will not function. Thats all there is to it

Re:Video enbeding!!

Posted by palebluedot - 2007/05/07 10:31

I used c0caine's code and it works great! Thank you kindly for everyone's hard work. Now if we could just get a button or dropdown in the BBCode toolbar to add this code in, I'd be in heaven. Thanks again.

Re:Video enbeding!!

Posted by freakshowtm - 2007/05/09 05:44

i'm having trouble downloading the file from the link above..

it says "Le document est actuellement en cours de modification et est donc indisponible."...unsure:

Well thats actually easily done:

First find the fb_bb.js.php in your /sources/ folder

Once youve opened it go to line 89 where it says (IMPORTANT: I had to change the because of errors in the forums ;) Change it back when you add it! REMOVE THE SPACES ;) ;)!!!!

```
bhtags = new Array(",","","","","","","","","","","","","","","");
```

Now you have to change it. If you have (for example) a tag for your youtube videos change it to the following

```
bhtags = new Array(",","","","","","","","","","","","","","","");
```

What is important now is that you have to know that the Tag is the 20th entry in the array! Its important because you need it for implementing a button. At the bottom of the page I added the code to add all tags at once!

Add the button:

Go to the smile.class.php in your default template folder and find the line

```
button" accesskey="y" name="addbbcode20" value="Youtube" style="text-decoration: underline; " onclick="bbstyle(20)" onmouseover="helpline('y')" />
```

Why addbbcode20 and bbstyle20? Remember the 20 I mentioned earlier. Its always the number in the array. The value="Youtube" is what it says on the button. Change it to whatever you want ^^

If you now want the helpline text to be working correctly you have to change the fb_bb.js.php again

Find the line

```
b_help = "";
```

and add below

```
y_help = "";
```

its y_help because when we added the support we said onmouseover="helpline('y')

Now open your german.php (in the administrator/components/com_fireboard/language folder) or whatever language you are using (obviously im German) and find the line

```
DEFINE('_BBCODE_BOLD','Fetter Text: text ');
```

In your version it probably says something else (mine is german) but the _BBCODE_BOLD part is always the same.

Now add below:

```
DEFINE('_BBCODE_YOUTUBE','Youtube Video: Video-ID ');
```

Repeat all these steps to add support for alle the other tags as well!

Now you should be all said and done ;)

I hope its now kinda clear how to add all these things, I tried to make it as easy as possible...

edit: If you want to add them all at once, here is what I did, just find the lines mentioned earlier and add it (AGAIN I CHANGED IT TO !!!):

```
bhtags = new Array(",","","","","","","","","","","","","","","","","","","","","","","","","","");
```

```
y_help = "";
```

```
g_help = "";
```

```
z_help = "";
```

```
m_help = "";
```

```
button" accesskey="g" name="addbbcode20" value="Google" style="text-decoration: underline; "
onclick="bbstyle(22)" onmouseover="helpline('g')" />
```

```
button" accesskey="m" name="addbbcode20" value="Myvideo" style="text-decoration: underline; "
onclick="bbstyle(26)" onmouseover="helpline('m')" />
```

```
DEFINE('_BBCODE_YOUTUBE','Youtube Video: Video-ID ');
```

```
DEFINE('_BBCODE_GOOGLE','Google Video: Video-ID ');  
DEFINE('_BBCODE_CLIPFISH','Clipfish Video: Video-ID ');  
DEFINE('_BBCODE_MYVIDEO','Myvideo Video: Video-ID ');
```

Re:Video enbeding!!

Posted by palebluedot - 2007/05/12 01:23

c0caine: Thanks! Although, I think your first replacement code should be:

```
bbtags = new Array(",",";","<code>","</code>","<",">","<code>","</code>","<code>","</code>");
```

with the brackets, not the ones. Not sure if its different for german rev. Regardless, it worked great and I'm very happy with the results. Even learned a thing or two about how to customize my site further! I appreciate your hard work.

=====

Re:Video enbeding!!

Posted by c0caine - 2007/05/12 10:46

Don't exactly know what you mean, but its early in the morning so I guess thats alright ;)

Im glad to hear that its working for you :)

=====

Re:Video enbeding!!

Posted by palebluedot - 2007/05/12 22:34

Sorry, the forum keeps changing the 's to 's when pasting in the code tag.

I guess I figured out why your post changed that as well LOL.

Here is an image of the code I 'meant' to post (and I guess you did too)

http://www.bestofjoomla.com/components/com_fireboard/uploaded/images/tags.jpg

Re:Video enbeding!!

Posted by sag - 2007/05/13 00:30

:unsure:

Hi,

I respect what you people doing, I really do.

However, I came to the point, after reinstalling fireboard several times, because of the mess that happened after inserting the code (following your directions). I really begin to think that:

"we" just pretend that code actually works

Or you are being selfish ...?

Please, if code really works as you said ...why couldn't you help us "regular humans" and post a file for download? And all we have to do is replace a file instead of entering the code....

Thank you

:unsure:

=====

Re:Video enbeding!!

Posted by c0caine - 2007/05/13 01:46

Lol of course I can do that. Just tell me what version of fireboard you use (the latest beta or the stable release) and what code you want implemented (video + buttons?)

=====

Re:Video enbeding!!

i only see vrsion 1.0.0 here

=====

Re:Video enbeding!!

Posted by c0caine - 2007/05/13 02:05

there is a nightly build thats currently public but 1.0.0 is the stable release I was talking about

=====

Re:Video enbeding!!

Posted by paperboy - 2007/05/13 02:14

Thanks Man i never thought it will get so much attention when i started this topic, i've hanging back waiting for the next version with all this features on it and an easy way to import/migrate joomlaboard, cause i suck at this code stuff, in fact i would never get my site off the ground if it wasn't for good helping people like you guys, so thanks to a great community.
J

Re:Video embeding!!

Posted by c0caine - 2007/05/13 02:15

I hope I didnt forget anything ;)

english.php /administrator/components/com_fireboard/language

fb_bb.js.php /components/com_fireboard/sources/

smiles.class.php /components/com_fireboard/template/ in your template folder (if it doesnt exist in the template folder overwrite the one in the default folder)

edit: please use the file below

Post edited by: c0caine, at: 2007/05/13 04:41

Re:Video embeding!!

Posted by sag - 2007/05/13 03:36

Unbelievable!
It really is working!

Well I do have one error message like this:

Warning: main(/www/htdocs/nsound/exo/itemstats/joomla_itemstats.php) : failed to open stream: No such file or directory in /home/...../public_html/components/com_fireboard/template/default/smile.class.php on line 43

C0cain great job man.

p.s is there chance to fix this error message?

Re:Video embeding!!

Posted by c0caine - 2007/05/13 03:38

lol yes sry i was too lazy to download the original smile.class.php and just gave you mine and there is a link to itemstats which im using... just a sec...

open the smile.class.php in an editor and delete the

```
include_once ('/www/htdocs/nsound/exo/itemstats/joomla_itemstats.php');
```

at the beginning of it... or just download the fixed zip ;) I hope its the only reference to it...
http://www.bestofjoomla.com/components/com_fireboard/uploaded/files/Video_Files_2.zip

c0caine wrote:
I hope I didnt forget anything ;)

[english.php /administrator/components/com_fireboard/language](#)

[fb_bb.js.php /components/com_fireboard/sources/](#)

smiles.class.php /components/com_fireboard/template/ in your template folder (if it doesnt exist in the template folder overwrite the one in the default folder)

edit: please use the file below
Post edited by: c0caine, at: 2007/05/13 04:41
Regarding the smiles.class.php file. There's no file named that in my template folder. Which default folder do you mean?

And I am using Dorona Brown 1.0.1, is there a kind soul who can help me with a button for this template?

=====
Re:Video enbeding!!

Posted by c0caine - 2007/05/31 14:02

in the fireboard template folder there is a default and a dorona brown folder i guess. Its not in the dorona brown but in the default folder

=====
Re:Video enbeding!!

Posted by Preacher - 2007/05/31 15:01

Yay! Works!!!! But now my post form is very small :| + it says stuff like this:
Re:Test (1 _FB_PATHWAY_VIEWING) and at the top it says _FB_FORUMTOOLS + at the bottom GO button it says: _FB_FORUM_TOP

=====
Re:Video enbeding!!

Posted by Preacher - 2007/05/31 15:09

You can see what the forum looks like here:
http://d8937254.u135.surftown.dk//index.php?option=com_fireboard&Itemid=27&func=showcat&catid=2

The admin is also filled with changes to the options like _FB_whatever_

Returned the forum to the old files, since it looked weird.

=====
Re:Video enbeding!!

Posted by c0caine - 2007/05/31 15:17

well the files I posted were fireboard v1.0 files. I havent switched to v1.0.1 because of the major changes in their release. I have personally modded so many files that it would be tons of work for me to upgrade to 1.0.1

=====
Re:Video enbeding!!

Posted by Preacher - 2007/05/31 15:50

Oh.. I am sorry to hear this, since adding video to the forum would kick ass :|

=====
Re:Video enbeding!!

Posted by jasonrhl - 2007/06/02 00:53

Why dont all the component makers have mambot/plugin support? Joomla and its components always seem so separated when you cant use the mambots.

Im about to add this code to my forum. When the next version is released will I have to hack the code again??

thanks

Jason

EDIT: seems to not work to well with 1.01 :)

Re:Video enbeding!!

Posted by paperboy - 2007/06/02 01:25

You guys are talking about a separate hack posted by c0caine (i think)from this thread that worked well before, but the developer team noted this request for the final version and that is separate from this hack, read the first two pages of this topic.

Cheers

J

oh i see it now its commercial :(

=====

Re:Video enbeding!!

Posted by maikreynolds - 2007/06/11 02:40

I already downloaded the hoteditor zip file and I'm testing it right now.

Yes, it's free. Like other GPL license software I saw hoteditor displays a credit message "Hoteditor Powered by ...". But you still have an option to pay a fee to remove it. Go and read more information on their site.

ok but how to intergrate it?

Re:Video enbeding!!

Posted by maikreynolds - 2007/06/11 22:16

I wish I knew :) - Hope someone can do it. I already tested Hoteditor with MyBB & phpBB3 - it looks pretty nice and works awesome.

Re:Video enbeding!!

Posted by Saeky - 2007/06/16 05:34

well, I don't know what exactly our problems are, but I just want to play Youtube on mysite, so I replace the code like this (in smile.class.php), and it works:

Re:Video enbeding!!

Posted by Saeky - 2007/06/16 05:39

yeh, this is the file, I can't post in this post because the bug of forum, sorry!
http://www.bestofjoomla.com/components/com_fireboard/uploaded/files/smile-515338525a8763045a9d743e94d91bb7.zip

Re:Video enbeding!!

Posted by peetree21 - 2007/06/16 08:58

i hope the BOJ team work with you c0caine to implement your work in the next release (1.0.2???) of fireboard. it seems like it wont take too much effort to have these features included.

Re:Video enbeding!!

Posted by Saeky - 2007/06/16 11:36

well, the problem from the enlish.php, if we don't fix it, the errors won't appear, i don't know why, but i think youtube on my site is great, hope someone can fix it soon...

=====

Re:Video enbeding!!

Posted by greatpixels - 2007/07/07 12:02

Thanks for good ideas guys.

I added joomla mambot support (disable/enable,message history,language etc) for next release.
I am using allvideo plugin on boj. Please take a look at this link:
http://www.bestofjoomla.com/component/option,com_fireboard/func,view/id,13993/catid,25/

Thanks again.;)

=====

Re:Video enbeding!!

Posted by Hazzaa - 2007/07/20 03:47

This an updated version of co0caine's version but for 1.0.1 Beta
With the original files, colors weren't working after the install.
This works perfect http://www.bestofjoomla.com/components/com_fireboard/uploaded/files/Video_Files_fireboard_1.rar

=====

Re:Video enbeding!!

Posted by hacksider - 2007/07/20 08:18

http://www.bestofjoomla.com/component/option,com_fireboard/Itemid,38/func,view/id,14788/catid,68/

That can help you activate mambots

=====

Re:Video enbeding!!

Posted by gavros7 - 2007/09/04 03:49

Hey has anyone run across this problem? After I copied the files that were in the zip file into their proper locations I noticed that when you click on the YouTube barcode link instead of getting I get

any ideas?

Thanks <http://www.bestofjoomla.com/images/fbfiles/images/test.png>

True, but the bbcode is still not integrated :(

=====

Re:Video enbeding!!

Posted by grumblemarc - 2007/09/08 00:51

I'm sure it's just a typo in the code. In the meantime it is a SIMPLE thing to type it out.

=====

Re:Video enbeding!!

Posted by clanspot - 2007/09/08 23:53

Yea, its simple for us as Admin/Mods because we know how to use the code.

But for members of a site.. thats not so simple! The key is: Keep It Simple Stupid!

The code should be quite simple to modify as you should just do the same as previously, minus adding the mambot support as it is already integrated.

I will see if I can't do it real quick.

James

=====

Re:Video enbeding!!

Posted by clanspot - 2007/09/09 00:52

Ok, I modified the original to work with Fireboard 1.0.3 if anyone is interested.

What I have done is attached the files and will attempt to explain the changes I made.

Ok here we go!

Notes:

1.)Before I begin, make sure you have in the configuration of Fireboard set it to use Mambots and if you haven't already please visit Joomla Extensions Directory and download the AllVideos Plugin and make sure it is installed and enabled in your Mambots.

2.)Another thing to remember when/if adding other buttons besides YouTube you have to use "{" instead of "Original Post

You will preform the same steps in mine as c0caine has done except in the Smile.Class.php file we do it a little diffrent.

Search for Code:

```
input type = "button" class = "button" accesskey = "h" name = "addbbcode24" value = "Hide" style = "text-decoration: underline; " onclick = "bbstyle(20)" onmouseover = "helpline('h')"
```

After that code insert:

```
input type = "button" class = "button" accesskey = "y" name = "addbbcode26" value = "Youtube" style = "text-decoration: underline; " onclick = "bbstyle(22)" onmouseover = "helpline('y')"
```

If you have done the other steps as per his original post, altering the other two files it should work for you.

If you should choose to add more than one button duplicate all of the steps but for each new line in the Smile.Class.php increase te addbbcode by "2" and the bbstyle by "2".

This should work, if anyone sees a flaw please let me know. I will continue testing.

Thanks,
James

Re:Video enbeding!!

Posted by babyfface - 2007/09/26 13:30

hi my fireboard version 1.0.3 but i cant find "smile.class.php" where is it?

Re:Video enbeding!!

Posted by grumblemarc - 2007/09/26 14:20

In your FB default template folder.

Re:Video enbeding!!

Posted by paperboy - 2007/09/26 14:28

Question, is this the fix from the older version to 1.0.3?
even though i started this topic i never uded the mod in fact i just upgraded from JB to FB1.0.3
so what are the steps for me?

and thanks to everyone. now if i can get fb to award a point to every post and keep track of it,
i'll be able to promote the site even better by let's say send the user a T-Shirt at 3000 points.
any takers on that?:laugh:
Jay.

Re:Video enbeding!!

Posted by babyfface - 2007/09/26 15:04

```
input type = "button" class = "button" accesskey = "y" name = "addbbcode26" value = "Youtube" style = "text-decoration: underline; " onclick = "bbstyle(22)" onmouseover = "helpline('y')"
```

i added the code to smile.class.php but it is not work.

the error: undefined

Re:Video enbeding!!

Posted by major_tom - 2007/09/26 19:33

you have to play a little with the bbcode numbers... 20 or 22 or 24 and so on

€: for the buttons you also have to edit the fb_bb.js.php file in the sources directory

i have it up and running, everythings working fine with 1.0.3 just the hide code does not work, but i dont mind...

demo: http://www.majors-welt.net/index.php?option=com_fireboard&func=view&catid=22&id=2629#2629

=====

Re:Video enbeding!!

it works but there's some littles mistakes

you have to adjust "adbbcode20" it's been repeated, solving this all it's ok

this is the correct code in smile.class.php

:S I'm not able to post the code

I attach my files changed <http://www.bestofjoomla.com/images/fbfiles/files/youtubebbcode.zip>

=====

Re:Video embedding!!

Posted by Wendyd - 2007/10/31 00:16

Just wondering if there are any plans to include video in the next release. My site is competing with a forum that uses vBulletin and they make it simple for their users to upload and convert Youtube videos etc. This would be a big plus for my site.
Waiting eagerly!
Wendy

=====

Re:Video embedding!!

Posted by grumblemarc - 2007/10/31 00:19

No new features are being planned until at least V2.0. The push now being to make Fireboard as bug free as possible as well as making it able to be run on J1.5 natively.

=====

Re:Video embedding!!

Posted by Wendy - 2007/10/31 01:12

Thank you for your response! I just finished uploading the files that bedo posted and reading the manual instructions by Major Tom. My site is working great. Now my users, with a little bit of instruction, can post videos. Thank you everyone who posted on this subject.

=====

My file to be change..Hope someone can help me to correct it. http://www.bestofjoomla.com/images/fbfiles/files/fb_bb-020009cf096b4d54e0e9e0e0c6680e0d.txt

=====

Re:Video embedding!!

Posted by jeffrey - 2007/12/14 17:51

Besides that, I didnt get the part after fb_bb.js.php.

I didnt get:

search for:

```
bhtags = new Array("","","","","","","","","","","");
```

// in the line add:

```
bhtags = new Array("","","","","","","","","","","","","","","","","");
```

// find

```
b_help = "";
```

//add below

```
y_help = "";
```

```
g_help = "";
```

```
z_help = "";
```

```
m_help = "";
```

//Now open your german.php (in the administrator/components/com_fireboard/language folder) or whatever language you are using (obviously im German)

//and find the line

```
DEFINE('_BBCODE_BOLD','Fetter Text: text');
```

// add below

```
DEFINE('_BBCODE_YOUTUBE','Youtube Video: Video-ID');
```

```
DEFINE('_BBCODE_GOOGLE','Google Video: Video-ID');
```

```
DEFINE('_BBCODE_CLIPFISH','Clipfish Video: Video-ID');
```

```
DEFINE('_BBCODE_MYVIDEO','Myvideo Video: Video-ID');
```

=====

Re:Video enbeding!!

Posted by Kody - 2007/12/26 02:32

Just wondering if anyone has come up with another fix for the new version of Fireboard 1.0.4?

=====

Re:Video embedding!!

Posted by grumblemarc - 2007/12/26 02:39

Why not just use the AllVideos plugin?

=====

Re:Video embedding!!

Posted by Kody - 2007/12/26 02:52

yeah, I downloaded it but I prefer to have it in the post it's just easier.

=====

Re:Video enbeding!!

Posted by schimpy - 2007/12/26 06:23

I would love it, when there's a solution for 1.0.4

=====

Did you post this in the right forum?

I think so, because it's related to this post... sorry the attachment failed.

here it is: http://www.bestofjoomla.com/images/fbfiles/files/fb_bb.rar

=====

Re:Video enbeding!!

Posted by albvital - 2008/10/12 00:58

I have Joomla 1.5 Native and use Fireboard 1.04. The problem is my Youtube videos come out looking like links, as opposed to being embedded on the forum. When I used to have Joomla 1.0, I had absolutely no problem embedding the videos. I have used everything, like AllVideos Plug in, and so on, but I need to know what I should be doing so that I don't have to convert the links, but have them automatically be embedded to the forum from the link provided. I want it to be more like vbulletin but if it cannot be done automatically, please let me know of any alternative options because I am pretty new at this stuff.

Thank you.

=====
