
Common Fixes for 1.0.1 Problems

Posted by palebluedot - 2007/06/01 08:01

Here is a list of common issues in Fireboard that have been fixed in 1.0.1. Please check here before creating a new thread. You may add to this thread, but only provide a description of the problem and the thread a solution can be found in. You may provide an image to better show the problem you are referring to. Please do not discuss these items here. Use the appropriate thread.

Q1. User Posts bar causing issues with forum layout

Q10: Wrong version numbers showing

Q10.1: Wrong version number showing in component list.

A10.1: what you need to do is:

- open 'fireboard.xml'
- go to line 9
- find 1.0.0 - beta
- change to 1.0.1 - beta

Q10.2: Wrong version number showing in adminpanel

A10.2: what you need to do is:

- open 'fireboard_config.php'
- go to line 103
- find `$fbConfig='1.0.0-beta';`
- change to `$fbConfig='1.0.1-beta';`

You can also download the zip file, unzip it, change it and rezip it.

Then install it as a component...Voila

Good luck :D
