
Module that list categories instead of latest post

Posted by jersonf - 2007/05/31 21:13

Hi.

I would like to know how can i change the latest posts module so it can list the forum categories instead of the latest posts.

Best regards.

Jerson Figueiredo.

Create a new menu and make every new menu item a link URL to that specific category, than name each link the same as your category.
